

LEAF PACK NETWORK

News and Updates from the Leaf Pack Network
A publication of the Stroud Water Research Center

Volume 1, Number 1, Fall 2002

ATTENTION! ATTENTION! COMING SOON TO A STREAM NEAR YOU.....

LEAVES

Did you know that September through November is the best time to do a leaf pack experiment? Your students could investigate local issues that affect your community, gather relevant ecological data, and learn how to apply that information to solve local problems. Putting these tools in the hands of students helps make science education relevant, empowering them to become involved in community issues such as facilitating communication within and between communities. Students make real-world connections with this hands-on experience.

Did you Know...

you can compare any two sets of data? Simply click on "Compare with other data" on the Summary Analysis page and let the computer do the work for you!

WANTED!

- 1) We want to showcase **YOU!** We anticipate a number of you incorporating Leaf Pack this fall. One group will be selected and featured in the next issue of this newsletter. This group will also be awarded a set of Leaf Pack flashcards. It could be you!
- 2) Do you have any questions or suggestions for the Network? We would love to hear from you! Email us at:
Leafpacknetwork@stroudcenter.org

Summer 2002 Update

Stroud Center educators along with our New York Streamkeepers partners had a successful summer in training 40 teachers in Purchase, NY and Somerset and Philadelphia, PA. We look forward to seeing their projects on the network in the months ahead.

Do you need a macroinvertebrate refresher? The Stroud Center is offering a variety of workshops this fall. Sign-up now by visiting:
